Test Objectives:	Ensure proper application functioning and data retrieval.
Techniques:	Execute each use-case-flow and identified test-target using valid and invalid input-data to verify the following: ● The expected results occur when valid data is used. ● The appropriate error / warning messages are displayed when invalid data is used. ● Each business rule is properly applied.
Completion Criteria	● All planned tests have been executed. ● All identified defects have been addressed.
Special Consideration	The system and tests run in the different environments: Linux, Mac, Windows (XP, Vista, 7,8,10, Server 2008). They are either emulated in a virtual machine or running as OS on the local-server.
